

TOP TIPS FOR SETTING UP YOUR LINKEDIN PROFILE

1. Clear Profile Picture

We are aware that not everyone has the opportunity to get their profile picture taken out by a professional, but a clear picture of the upper body and face will do!

2. Full Name & Headline

Always use your full name on LinkedIn, be sure to capitalize the first letter of your first name & last name. How jarring would my profile be if it were 'DINIELIA PILLAY'

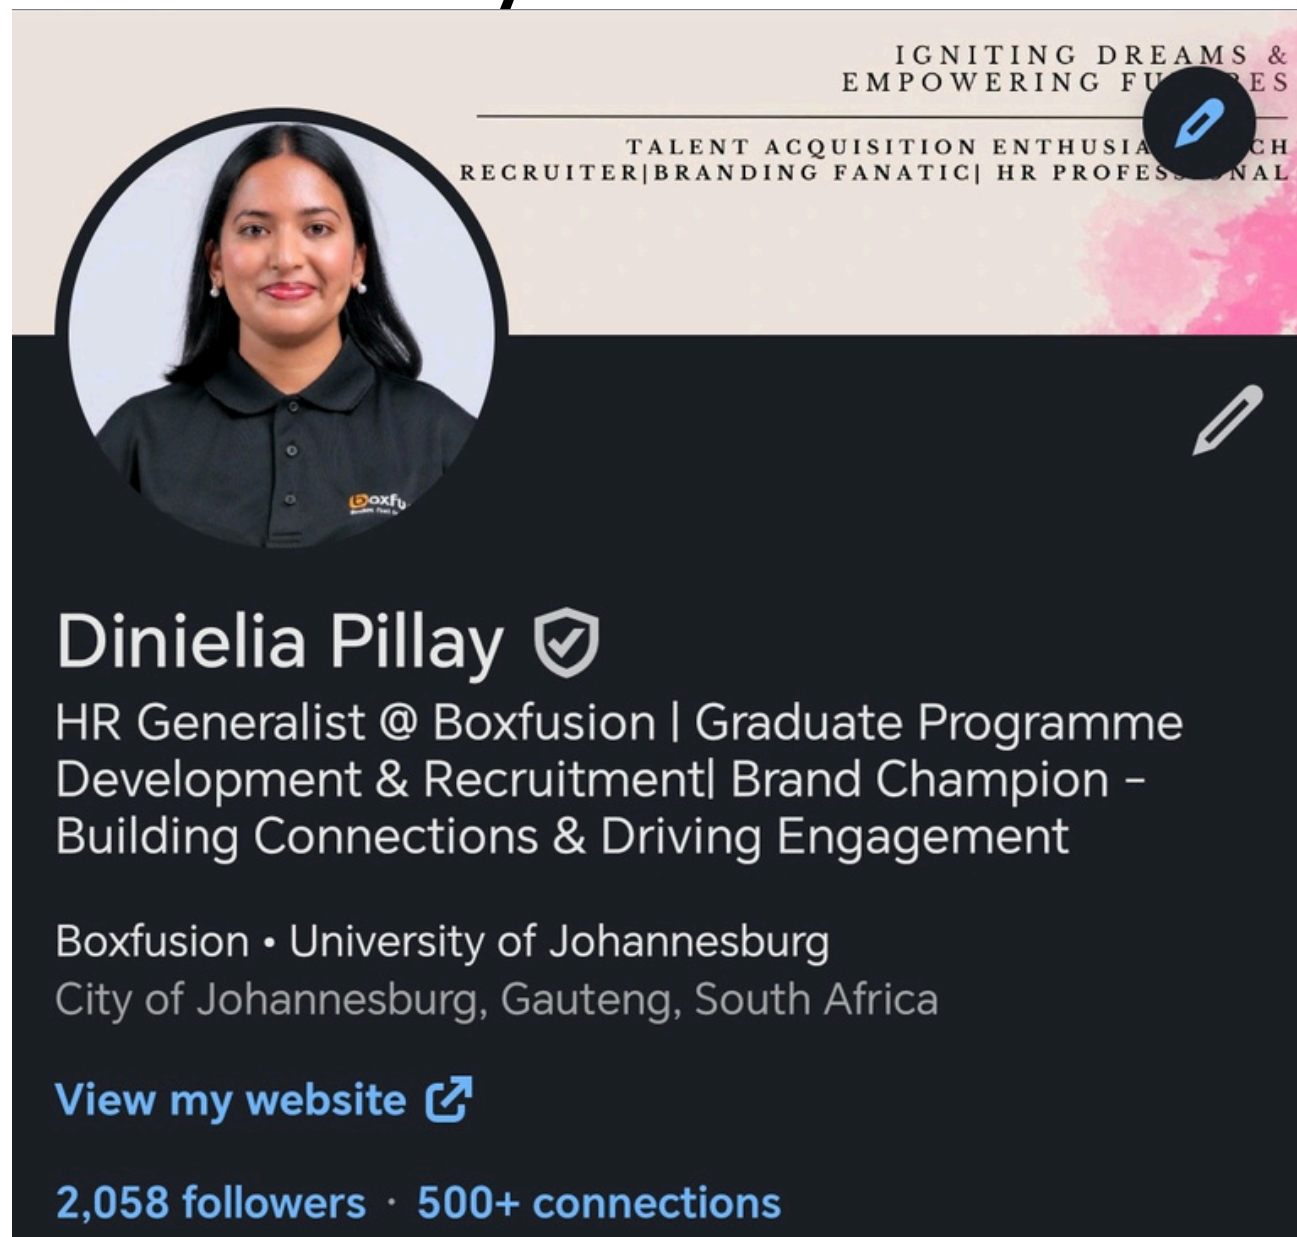

Headlines are important, including a title to make it easier for recruiters to search for you and further highlighting your area of expertise. If you're still studying you can use 'Final Year Computer Science student @ UJ'.

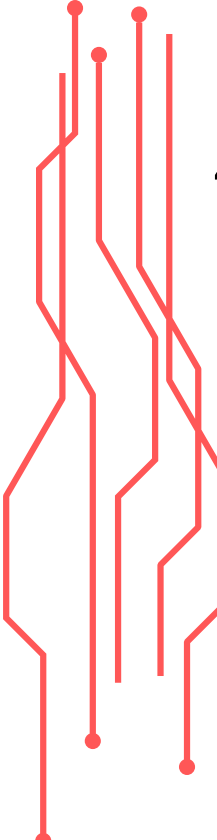

3. Link Additional Websites

Many individuals regardless of their field are going the extra mile to make a personal website that demonstrates their skills.

If you're in tech, you can link your website or your GitHub profile so that potential employers can view your work.

4. Include a Description

This is always important and useful for recruiters. Highlight your skills. If you're a developer, highlight your programming skills. If you're a student looking for a specific role, highlight that you're an aspiring data analyst and the tools you're familiar with. Don't be too generic, remember this is an extension of yourself. Adding a call to action at the end is always great

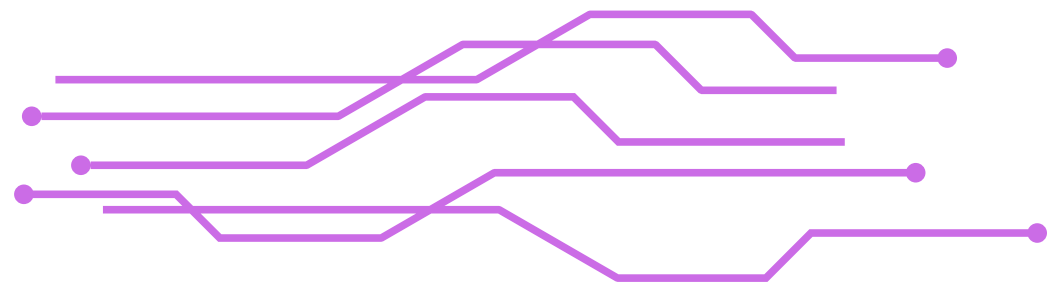

About

Passionate HR professional with a psychology background and certifications in AI, Financial Literacy, and HR Management.

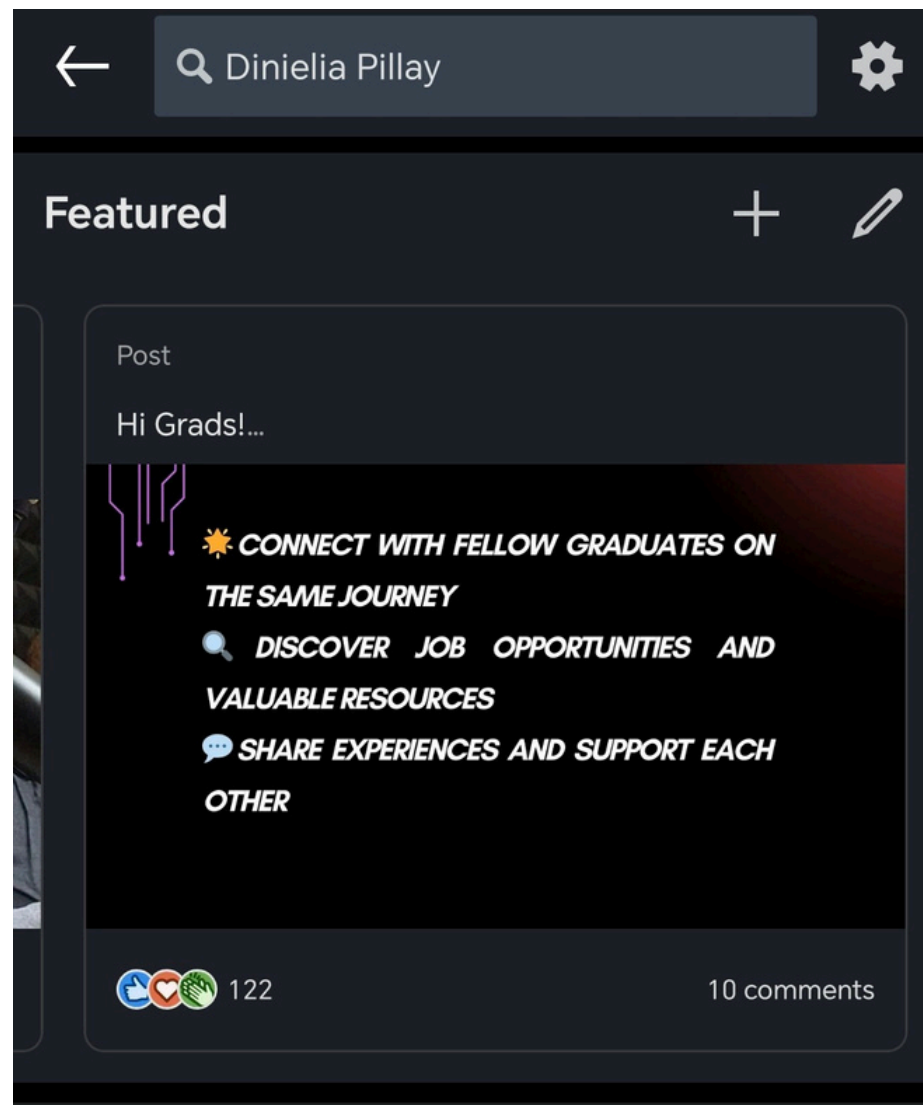

I am passionate about supporting emerging talent and dedicated to graduate recruitment and developing graduate programmes. I strive to build lasting relationships with universities, bootcamps, and individuals who share my passion for finding the right roles for the youth.

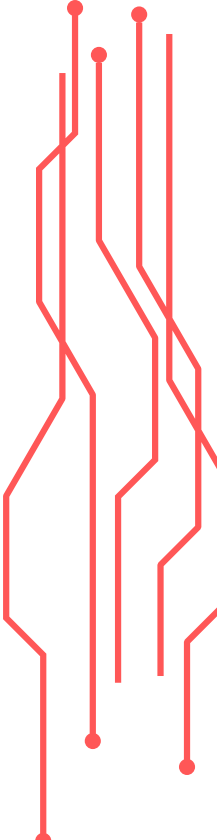

Got ideas for supporting emerging talent? Let's chat! Grads seeking advice, I'm here to help.

5. Feature Key Content

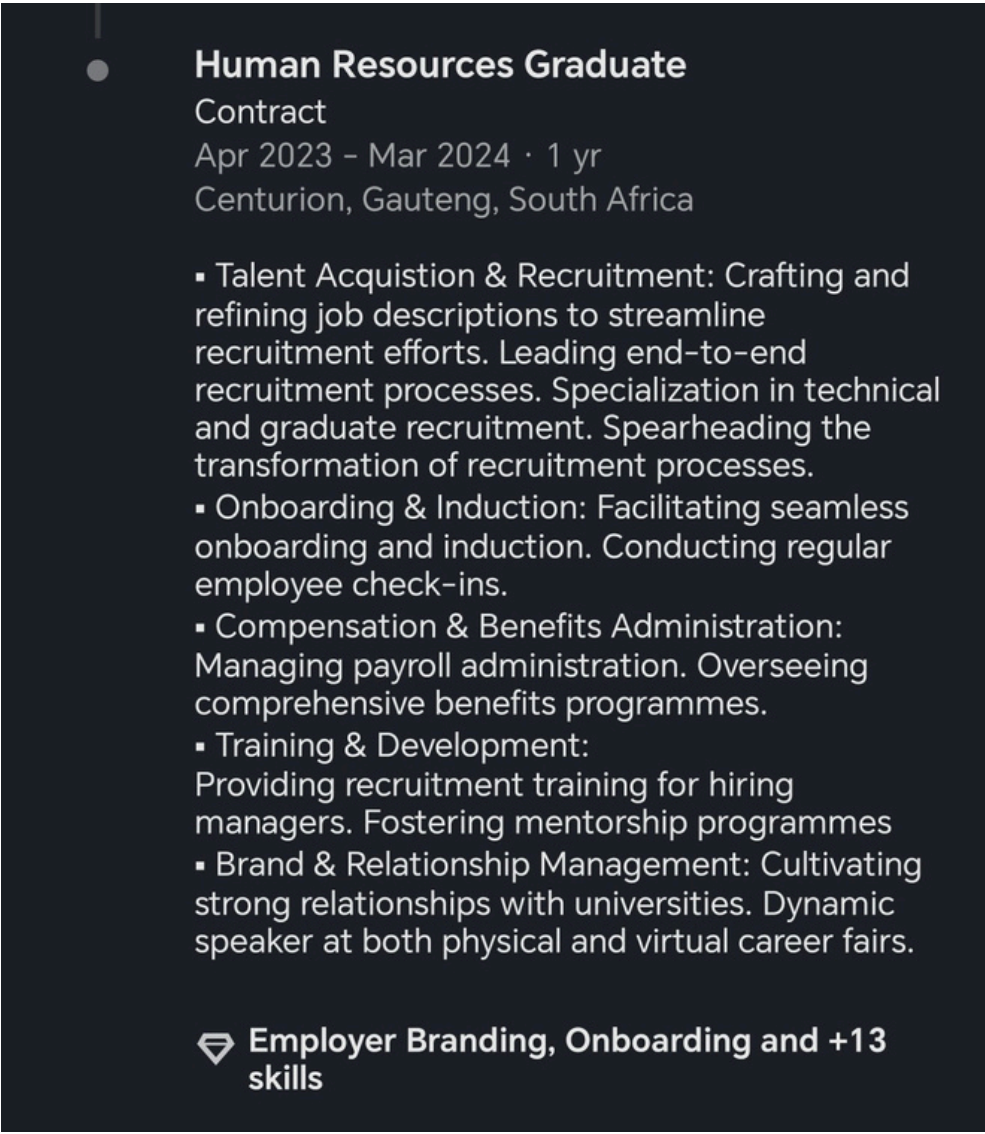

Some posts are more important than others, hence you might want to highlight these posts so that recruiters can view it upon glancing at your profile. This might be an award you received or an achievement you're particularly proud of.

6. Include a Description of Duties

Recruiters can see you worked at different companies but we want to know what did you do in those roles. If you're a student and had a job in a student society, include the role and what duties you performed.

Human Resources Graduate

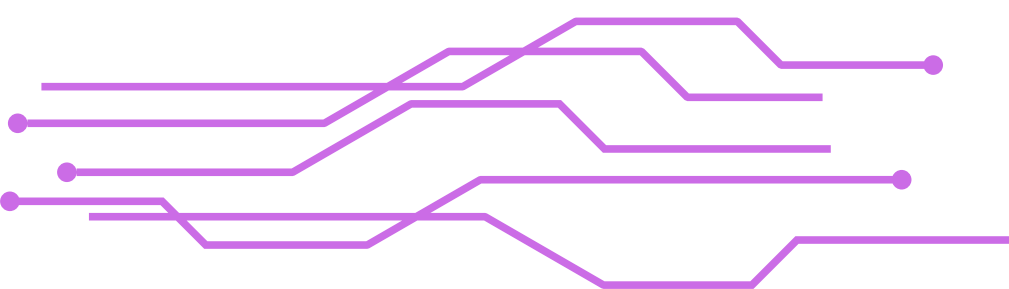

Contract

Apr 2023 – Mar 2024 · 1 yr

Centurion, Gauteng, South Africa
